

<sup>1</sup> THIS IS THE TITLE OF YOUR SPECIAL PROBLEM

<sup>2</sup> A Special Problem

<sup>3</sup> Presented to

<sup>4</sup> the Faculty of the Division of Physical Sciences and Mathematics

<sup>5</sup> College of Arts and Sciences

<sup>6</sup> University of the Philippines Visayas

<sup>7</sup> Miag-ao, Iloilo

<sup>8</sup> In Partial Fulfillment

<sup>9</sup> of the Requirements for the Degree of

<sup>10</sup> Bachelor of Science in Computer Science by

<sup>11</sup> LASTNAMEA, FirstName1

<sup>12</sup> LASTNAMEB, FirstName2

<sup>13</sup> LASTNAMEZ, FirstName3

<sup>14</sup> Francis DIMZON, Ph.D.

<sup>15</sup> Adviser

<sup>16</sup> February 13, 2026

17

## Approval Sheet

18

The Division of Physical Sciences and Mathematics, College of Arts and  
Sciences, University of the Philippines Visayas

19

certifies that this is the approved version of the following special problem:

20

**THIS IS THE TITLE OF YOUR SPECIAL PROBLEM**

21

**Approved by:**

Name

Signature

Date

Francis D. Dimzon, Ph.D.

## Dedication

“Hello, world.”

34

## Acknowledgment

35

“Hello, world.”

## Abstract

- 37 From 150 to 200 words of short, direct and complete sentences, the abstract should  
38 be informative enough to serve as a substitute for reading the entire SP document  
39 itself. It states the rationale and the objectives of the research. In the final Special  
40 Problem document (i.e., the document you'll submit for your final defense), the  
41 abstract should also contain a description of your research results, findings, and  
42 contribution(s).
- 43 Suggested keywords based on ACM Computing Classification system can be found  
44 at [https://dl.acm.org/ccs/ccs\\_flat.cfm](https://dl.acm.org/ccs/ccs_flat.cfm)
- 45 **Keywords:** Keyword 1, keyword 2, keyword 3, keyword 4, etc.

# <sup>66</sup> List of Figures

- <sup>67</sup> 1.1 This is the figure's caption – Disney stock chart. Captions should  
<sup>68</sup> fully describe the figure in a concise manner such that there is no  
<sup>69</sup> need to refer to the text when figuring out the graphic. . . . . 2

<sup>70</sup> **List of Tables**

<sup>71</sup> **Chapter 1**

<sup>72</sup> **Introduction**

<sup>73</sup> **1.1 Overview of the Current State of Technology**

<sup>74</sup> This section gives the reader an overview of the specific technology or field in the  
<sup>75</sup> international or local setting. The information regarding the technology or field  
<sup>76</sup> should be contemporary and not based on outdated sources. Discussion must not  
<sup>77</sup> be too technical or too detailed.

<sup>78</sup> This section ends with a discussion on the problem/s faced by or that still exist in  
<sup>79</sup> the specific technology or field (e.g., limitations of existing software or algorithms).  
<sup>80</sup> The problem statement would lead to the research objectives.

<sup>81</sup> It is easy to include a figure in JPG or PNG format as shown in the following  
<sup>82</sup> example. Make sure that you explain what the figure is all about, and that you  
<sup>83</sup> refer to your figure. Figures and Tables should appear after they were referred to  
<sup>84</sup> in the text. For example, Figure 1.1 shows a graph of the performance of Disney

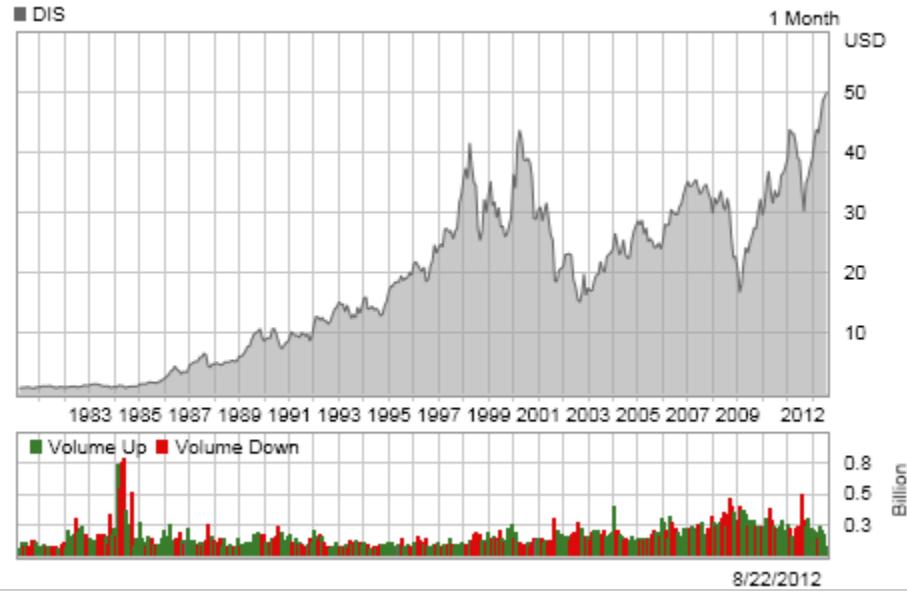

Figure 1.1: This is the figure's caption – Disney stock chart. Captions should fully describe the figure in a concise manner such that there is no need to refer to the text when figuring out the graphic.

<sup>85</sup> stock from the 1980s to 2012.

<sup>86</sup> Some notes on citing references. When using APA format, the author-date method  
<sup>87</sup> of citation is followed. This means that the author's last name and the year of  
<sup>88</sup> publication for the source should appear in the text, and a complete reference  
<sup>89</sup> should appear in the reference list.

<sup>90</sup> Here are some examples on how to do the referencing (note author's name and  
<sup>91</sup> years are different from commented examples). For APA citation details, refer to  
<sup>92</sup> <http://www.ctan.org/tex-archive/biblio/bibtex/contrib/apacite/>.

<sup>93</sup> • ? (?) compared reaction times...

<sup>94</sup> • In a recent study of reaction times (? , ?)...

<sup>95</sup> • In ?, ? compared reaction times...

- 96        • ? (?) compared reaction times...
- 97        • In a recent study of reaction times (?, ?)...
- 98        • In ?, ?, compared reaction times...

99        The following are references from journal articles (?, ?, ?, ?). Here's an MS thesis  
100      document (?, ?), and this is from PhD dissertation (?, ?). For a book, reference  
101      is given as (?, ?). Proceedings from a conference samples are (?, ?, ?, ?). The  
102      sample bibliography file named **myreferences.bib** is from the SIGGRAPH L<sup>A</sup>T<sub>E</sub>X  
103      template. You can use a text editor to view the contents of the bib file. It is your  
104      task to create your own bibliography file. For those who downloaded papers from  
105      ACM or IEEE sites, there is a BibTeX link that you can click; thereafter, you just  
106      simply need to copy and paste the BibTeX entry into your own bibliography file.

107      The following shows how to include a program source code (or algorithm). The  
108      verbatim environment, as the name suggests, outputs text (including white spaces)  
109      as is...

```
110                  #include <stdio.h>
111                  main()
112                  {
113                          printf("Hello world!\n");
114                  }
```

## <sup>115</sup> 1.2 Problem Statement

<sup>116</sup> DO NOT FORGET to write the statement of the research problem here, i.e.,  
<sup>117</sup> before the Research Objectives.

<sup>118</sup> A problem statement is your research problem written explicitly. The problem  
<sup>119</sup> statement should do four things:

- <sup>120</sup> 1. Specify and describe the problem (with appropriate citations)
- <sup>121</sup> 2. Provide evidence of the problem's existence
- <sup>122</sup> 3. Explain the consequences of NOT solving the problem
- <sup>123</sup> 4. Identify what is not known about the problem that should be known.

## <sup>124</sup> 1.3 Research Objectives

### <sup>125</sup> 1.3.1 General Objective

<sup>126</sup> This subsection states the over-all goal that must be achieved to answer the  
<sup>127</sup> problem. Address the following: Given your research challenge or opportunity,  
<sup>128</sup> how do you intend to solve it? What is the output of your research?

### <sup>129</sup> 1.3.2 Specific Objectives

<sup>130</sup> This subsection is an elaboration of the general objective. It states the specific  
<sup>131</sup> steps that must be undertaken to accomplish the general objective. These objec-

<sup>132</sup> tives must be **S**pecific, **M**easurable, **A**ttainable, **R**ealistic, **T**ime-bounded. A spe-  
<sup>133</sup> cific objective start with “to <verb>” for example: to design/survey/review/analyze.

<sup>134</sup> Studying a particular programming language or development tool (e.g., to study  
<sup>135</sup> Windows/Object-Oriented/Graphics/C++ programming) to accomplish the gen-  
<sup>136</sup> eral objective is inherent in all thesis and, therefore, must not be included here.

- <sup>137</sup> 1. To review related literature, compare and contrast existing algorithms (on  
<sup>138</sup> what problem?);
- <sup>139</sup> 2. To develop a new algorithm (for what purpose?)
- <sup>140</sup> 3. To analyze the algorithm (based on what criteria?)

## <sup>141</sup> 1.4 Scope and Limitations of the Research

<sup>142</sup> This section discusses the boundaries (with respect to the objectives) of the re-  
<sup>143</sup> search and the constraints within which the research was developed.

## <sup>144</sup> 1.5 Significance of the Research

<sup>145</sup> This section explains why research was done in this area. It rationalizes the ob-  
<sup>146</sup> jective of the research with that of the stated problem. Avoid including sentences  
<sup>147</sup> such as “This research is beneficial to the proponent/department/college” as this  
<sup>148</sup> is already an inherent requirement of all BSCS majors. Focus on the research’s  
<sup>149</sup> contribution to the Computer Science field.

<sub>150</sub> The following are guide questions that may help you formulate the significance  
<sub>151</sub> of your research.

- <sub>152</sub> • What is the relevance of your work to the computer science community?
- <sub>153</sub> – What are your technical contributions, in terms of algorithms, or ap-
- <sub>154</sub> proaches, or new domain?
- <sub>155</sub> – What is your value-added compared to existing systems?
- <sub>156</sub> • What are your contributions to society in general?
- <sub>157</sub> – Who benefits from your system?
- <sub>158</sub> – Who are your target users and how this system benefit them?

<sup>159</sup> **Chapter 2**

<sup>160</sup> **Review of Related Literature**

<sup>161</sup> This chapter discusses the features, capabilities, and limitations of existing re-  
<sup>162</sup> search, algorithms, or software that are related/similar to the Special Problem.

<sup>163</sup> The reviewed works and software must be arranged either in chronological order,  
<sup>164</sup> or by area (from general to specific). Observe a consistent format when presenting  
<sup>165</sup> each of the reviewed works. This must be selected in consultation with the adviser.

<sup>166</sup> **DO NOT FORGET to cite your references.**

<sup>167</sup> A literature review must do these things:

<sup>168</sup>     • be organized around and related directly to the thesis or research question

<sup>169</sup>         you are developing

<sup>170</sup>     • synthesize results into a summary of what is and is not known

<sup>171</sup>     • identify areas of controversy in the literature

- <sup>172</sup> • formulate questions that need further research

<sup>173</sup> A literature review is a piece of discursive prose, not a list describing or summarizing one piece of literature after another. It's usually a bad sign to see every paragraph beginning with the name of a researcher. Instead, organize the literature review into sections that present themes or identify trends, including relevant theory. You are not trying to list all the materials published, but to synthesize and evaluate them according to the guiding concept of your thesis or research question. You should also state the limits or gaps of their researches wherein you will try to fill these gaps in accordance to your research problem and objectives.

## <sup>181</sup> **2.1 Theme 1 Title**

<sup>182</sup> This chapter contains a review of research papers that:

- <sup>183</sup> • Describes work on a research area that is similar or relevant to yours
- <sup>184</sup> • Describes work on a domain that is similar or relevant to yours
- <sup>185</sup> • Uses an algorithm that may be useful to your work
- <sup>186</sup> • Uses a software / tool that may be useful to your work

<sup>187</sup> It also contains a review of software systems that:

- <sup>188</sup> • Belongs to a research area similar to yours
- <sup>189</sup> • Addresses a need or domain similar to yours
- <sup>190</sup> • Is your predecessor

<sup>191</sup> **2.2 Theme 2 Title**<sup>192</sup> **2.3 Chapter Summary**

<sup>193</sup> Should include a table of related studies comparing them based on several criteria.

<sup>194</sup> Highlight research gaps and the research problem.

<sup>195</sup> **Chapter 3**

<sup>196</sup> **Research Methodology**

<sup>197</sup> This chapter lists and discusses the specific steps and activities that were per-  
<sup>198</sup> formed to accomplish the project. The discussion covers the activities from pre-  
<sup>199</sup> proposal to Final SP Writing.

<sup>200</sup> **3.1 Research Activities**

<sup>201</sup> Research activities include inquiry, survey, research, brainstorming, canvassing,  
<sup>202</sup> consultation, review, interview, observe, experiment, design, test, document, etc.  
<sup>203</sup> Be sure that for each method, process, or algorithm used, there is a justifica-  
<sup>204</sup> tion why that method was chosen. The methodology also includes the following  
<sup>205</sup> information:

- <sup>206</sup>     ● who is responsible for the task  
<sup>207</sup>     ● the resource person to be contacted

- 208        • what were done
- 209        • when and how long the activity was done
- 210        • where it was done
- 211        • why should the activity was done

<sup>212</sup> **Chapter 4**

<sup>213</sup> **Results and Discussions**

- <sup>214</sup> This chapter presents the results or the system of your SP. Include screenshots,
- <sup>215</sup> tables, or graphs and provide the discussion of results.

<sup>216</sup> **Chapter 5**

<sup>217</sup> **Conclusion**

<sup>218</sup> This chapter summarizes your SP and provides conclusions regarding your results  
<sup>219</sup> and analyses. Provide recommendations on what ought to be done with your SP  
<sup>220</sup> or provide further directions on the topic you covered.
